

Rear Projection SMART Board™ 3000i

Interactive Whiteboard

Touch the screen to control your computer

Write in electronic ink

Save your work in various formats

Display a superior, sharp image

Maximize space with the slim cabinet

Brilliance at your fingertip.

The Rear Projection SMART Board 3000i interactive whiteboard makes presentations come alive. Simply touch the screen to control computer applications, give presentations and navigate Web sites. To highlight material, just pick up a pen. You can write over any application or Web site, and capture, edit and save all your material.

The 3000i displays a high-quality, clear image. With an integrated projector and innovative touch system, the 3000i delivers both superior image quality and simple touch control.

The slim, tapered cabinet fits into a variety of settings and has space to hold your computer and peripherals. A side shelf and cables let you easily connect a laptop and control the image from the screen.

Dimensions

Size

57 3/8" W x 79" H x 29 1/4" D (145.8 cm x 200.7 cm x 74 cm)

SMART Pen Tray

Features

Touch System

Digital-vision touch (DVIT™) technology, developed by SMART (patents pending), lets you use your finger as a mouse and write on the screen – without any special tools. DVIT technology uses cameras in the corners to track contact on the screen.

SMART Pen Tray

Optical sensors automatically detect when a stylus or the eraser is selected, while buttons activate the on-screen keyboard and right mouse click. Whisper-tip™ styluses and eraser included.

SMART Board Software

Write over top of any computer application, write and edit notes, and save everything in a single file. The numerous features include Notebook™ software, which captures annotations and saves your notes, SMART Recorder (Microsoft® Windows® systems only), which saves audio and data for playback as a synchronized file, and SMART Video Player, which enables you to write over top of moving or still video.

Integrated Projector

True-XGA (1024 x 768) projector with custom-designed lens and 2,500 lumens comes installed.

Space-Saving Cabinet

Only 29 1/4" (74 cm) deep, the tapered, mobile cabinet fits easily into corners. Equipped with four locking casters and lockable doors. Optional video camera shelf also available.

SMART Super Screen

Diffusion screen significantly reduces ambient light reflection and glare, and delivers a high-contrast, uniform image with a wide viewing angle.

Projector Control Panel

Controls projector power, brightness and contrast.

Laptop Support

Shelf and connection cables attach to either side of cabinet.

Audio System

Stereo-amplified speakers and volume controls on front of cabinet.

X-Port™ 20 Switch

Switches serial, audio and video from the internal computer to a connected laptop.

Connection Panel

Connects such peripherals as a second projector, external audio system, network, printer or other serial device.

Rack Shelving

Standard 19" (48 cm) rack allows for peripheral integration and storage in the cabinet.

Wireless Keyboard and Holder

Standard Windows operating system keyboard with built-in trackball.

Room-Control Module (Optional)

Integrates the 3000i with a room-control system, so projector, audio and source switching can be controlled from the system.

System Requirements

Computer Requirements

SMART Board software is available for multiple operating systems in multiple languages. For a complete list, visit www.smarttech.com/customers/software.htm.

Windows Operating System

486DX 66 MHz or higher processor (Pentium® processor recommended)
 16 MB of RAM (24 MB recommended)
